

Skinningrove NNE – ENE

SKINNINGROVE *Direction:* NNE to ENE

Site Code: 12.062 *Location:* NZ 715205 Post code TS13 4ES

Emergency 3 words influencing.headboard.candles (Take off)

Access: Drive through Carlin How, turn left after the steelworks and follow the road. Park after the church (TS13 4ES) and carry the glider along the path 400yds to the edge.

Height: Approx. 200ft

Length: Approx 1 mile, giving access to 10 miles of soar-able cliffs and dunes. (see section 6).

Description: Sheer sea cliffs with steeply sloping grass banks on either side. Gives access to longer cliffs to the north and south.

Suitability: All pilots who can soar. Like Saltburn this is an excellent coastal site.

Site Rules

Please read these carefully in conjunction with the attached map before flying the site.

1. Do not enter the steel works.

Take-off: Take offs from the sheer cliff face have been used most frequently from this site, however this is not recommended unless the pilot is experienced and the winds are light. The grassy banks on either side have been used with some success recently for a safer take off.

Landings: Top: Mainly on derelict land behind the grass bank, well back to avoid ROTOR which has been experienced with the wind strong and crossed.

Bottom: Mainly on the beach north of the jetty. Some beach is present even at high tide.

Comments: A useful site if the wind is too crossed for Saltburn.
